Work Experience

Senior Front-end/Back-end Engineer at AgileSix
November 2021 - September 2024

• Optimized form data input for veteran debt management by migrating React front-end logic to Ruby on Rails back-end
• Refactored Drupal, MetalSmith and React static build to boost performance, page output, and test coverage
• Integrated new React components and Rails API data for veteran event listings, police data reports, and health facilities
• Expanded Rails API endpoint data for Next.JS veteran facility pages with additional testing and data tracking
• Implemented interactive exhibit components in React and web accessibility standards for digital museum experience

Front-end Engineer at SeeClickFix/CivicPlus
February 2017 - November 2021

• Streamlined development on client-facing apps in React, Ember, and Rails with new pattern library and design system
• Modernized citizen request portal with responsive, accessible Ember and React front-end compatible with new API features
• Expanded Rails API to include multiple new datasets and features for client requests and work orders
• Remade company WordPress site to market new products

Interactive Developer at Alden Image
May 2015 - February 2017

• Built component libraries and design systems for clients' internal communications with Angular, Sass, and jQuery
• Guided client's web campaign strategy with new Google Analytics reports and data analysis
• Improved clients' marketing reach and sales with custom-built WordPress websites and continuous updates based on analytics data.

Summary

Senior Full-stack Developer with nine years of experience on the front-end and seven years on the back-end. Passionate about full-stack development, web accessibility, and continuous learning.
